Certificates

- Advance Sql Bootcamp from Udemy.
- ASP.NET Core - SOLID and Clean Architecture from Udemy
- Asp.net C# from SIS Technology
- Dot net core MVC (.net8) from Udemy
- ASP.NET Core Web API from Udemy

Projects

Complaint Management System

- **Technology Used:** ASP.NET, C#, HTML, CSS, Bootstrap, SQL Server
- **Role:** Developed a web-based Complaint Management System to streamline the process of lodging, tracking, and resolving complaints.
- **Database:** SQL Server was used for efficient data storage.
- **Features:** User authentication, complaint categorization, real-time status updates, and reporting.

Human Resource Management System

- **Technology Used:** ASP.NET, C#, HTML, CSS, Bootstrap, SQL Server
- **Role:** Developed a comprehensive Human Resource Management System (HRMS) to streamline employee data management, payroll, and performance tracking.
- **Database:** SQL Server was used to store employee records.

Employee Portal

- **Technology Used:** ASP.NET, C#, HTML, CSS, Bootstrap, SQL Server
- **Role:** Developed an Employee Portal to streamline internal communication, task management, and HR-related processes.
- **Database:** SQL Server was used to store employee data.

Solar Portal

- **Technology Used:** ASP.NET, C#, HTML, CSS, Bootstrap, SQL Server
- **Role:** Working on Existing Application Solar Portal. This portal is used to give the subsidy on state level for the user who purchase solar from state government upto 2 kw.
- **Database:** SQL Server was used to store employee details.
